

SMT-600REY Central System

The **SMT 600REY** central system is our rack mounted central cleaning system. Controlled remotely, it will operate up to 10 remote locations located up to 500 feet from the main unit. This allows you to clean in many different areas of your facility with the push of a button. Each remote location allows you complete control and selection between high pressure rinse and two chemical options. The SMT Team will help you design a central cleaning system to effectively clean your entire facility and **POWER UP YOUR CLEAN.**

- FEATURES**
- Liquid Filled Pressure Gauge
 - Master Control Panel, 24V
 - Water Level Float Switch
 - Manifold with SS Bleeder Valve
 - Automatic Line Pressure Relief
 - Manifold Hose
 - 6' Supply Hose
 - Maintenance Kit Included
