

SMT - Central Systems

Central Systems from Spray Master Technologies® are ideal for those who need to clean multiple areas within the same facility. SMT's Central System serves multiple remote locations from one centrally located pumping unit.

If you have multiple users, add more SMT units with our rack mount system. Up to three can be installed on each rack.

Adjustable chemical injection and water pressure can be set to your specifications, giving you full control over your cleaning needs. SMT is made to fit your facility and made to meet your needs.

If you want customization, ease of use, and fast cleaning time USE SMT.

3 Easy Steps To Clean!

Stainless steel tubing connects the main pumping unit to multiple remote station boxes that are installed in convenient locations. Remote boxes can be installed in any type of wall for retrofits or new construction.

**USING SMT IS
EASY AS
1-2-3**

- STEP 1** *Walk hose reel up to remote station, quick connect the hose to the remote station.*
- STEP 2** *Turn on the main unit and select 'soap' or 'rinse'.*
- STEP 3** *Wash down the desired area. You're Finished!*
