

REMOTES Central System

Surface Mount. Call for a Quote

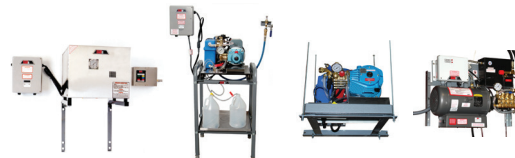

300-1698: Surface Mount

Remotes are supplied with high pressure via a high pressure drop hose or can be plumbed with stainless steel tubing. They are the key component of the SMT Central System.

- Remote Stations can be located up to 500 feet from the pumping station
- Remotes available for both surface and recess installation, retrofit, or new construction
- Installs into masonry, wood stud, or steel frame walls
- Optional key lock covers
- All remotes are UL 1776
