The Vacuum Port Remote Station is a combination remote for pressurized water and centralized vacuum. This is the key component of the SMT VacMaster® System.

Remote stations can be located up to 500 feet from the central pressure unit and 300 feet from the central wet vacuum system.

The Vacuum Port Remote Station is ETL Listed to UL 1776.

SMT SQUEEGEE Accessory

Squeegie.Call for a Quote

300-7398: Wet Vacuum Tool - Squeegee

All lightweight stainless steel wand with an ergonomic handle and rear wheel for easy gliding action. The vacuum squeegee has a push/pull action. Removeable squeegee unit for easy replacement.

This is a vacuum squeegee only and does not pressure wash.
